

# UI Structured Product Builder

- Index creator use case:**
1. Create ACTION #1:
    - select network (Avalanche)
    - select action (Deposit to Anchor)
  2. Create Action #2:
    - select network (Ethereum)
    - select action (buy stETH on Curve)
  3. Set ratio (80% for ACTION #1 and 20% for ACTION #2)
  4. Set rebalancing threshold (10)
  5. Set minimum deposit for buying (5000 USDC)
  6. Set check frequency (1 hour)
- possible improvements:  
possibility to deposit with USDT and USDC  
set up pool capacity  
set performance fee

**Strategy config:**  
action1\_chain: <chainId>  
action1\_addr: <anchor\_addr>  
action1\_abi: <abi\_json>  
action1\_method: <depositStable>  
action2\_chain: <chainId>  
action2\_addr: <curve\_router\_addr>  
action2\_abi: <abi\_json>  
action2\_method: <swap>

ratio: <[asset1: 80%, asset2: 20%]>  
thresholds: <[90/10, 70/30]>  
minimum\_to\_buy: <5000>
