

DeCommas

Cross-chain DeFi
automation layer

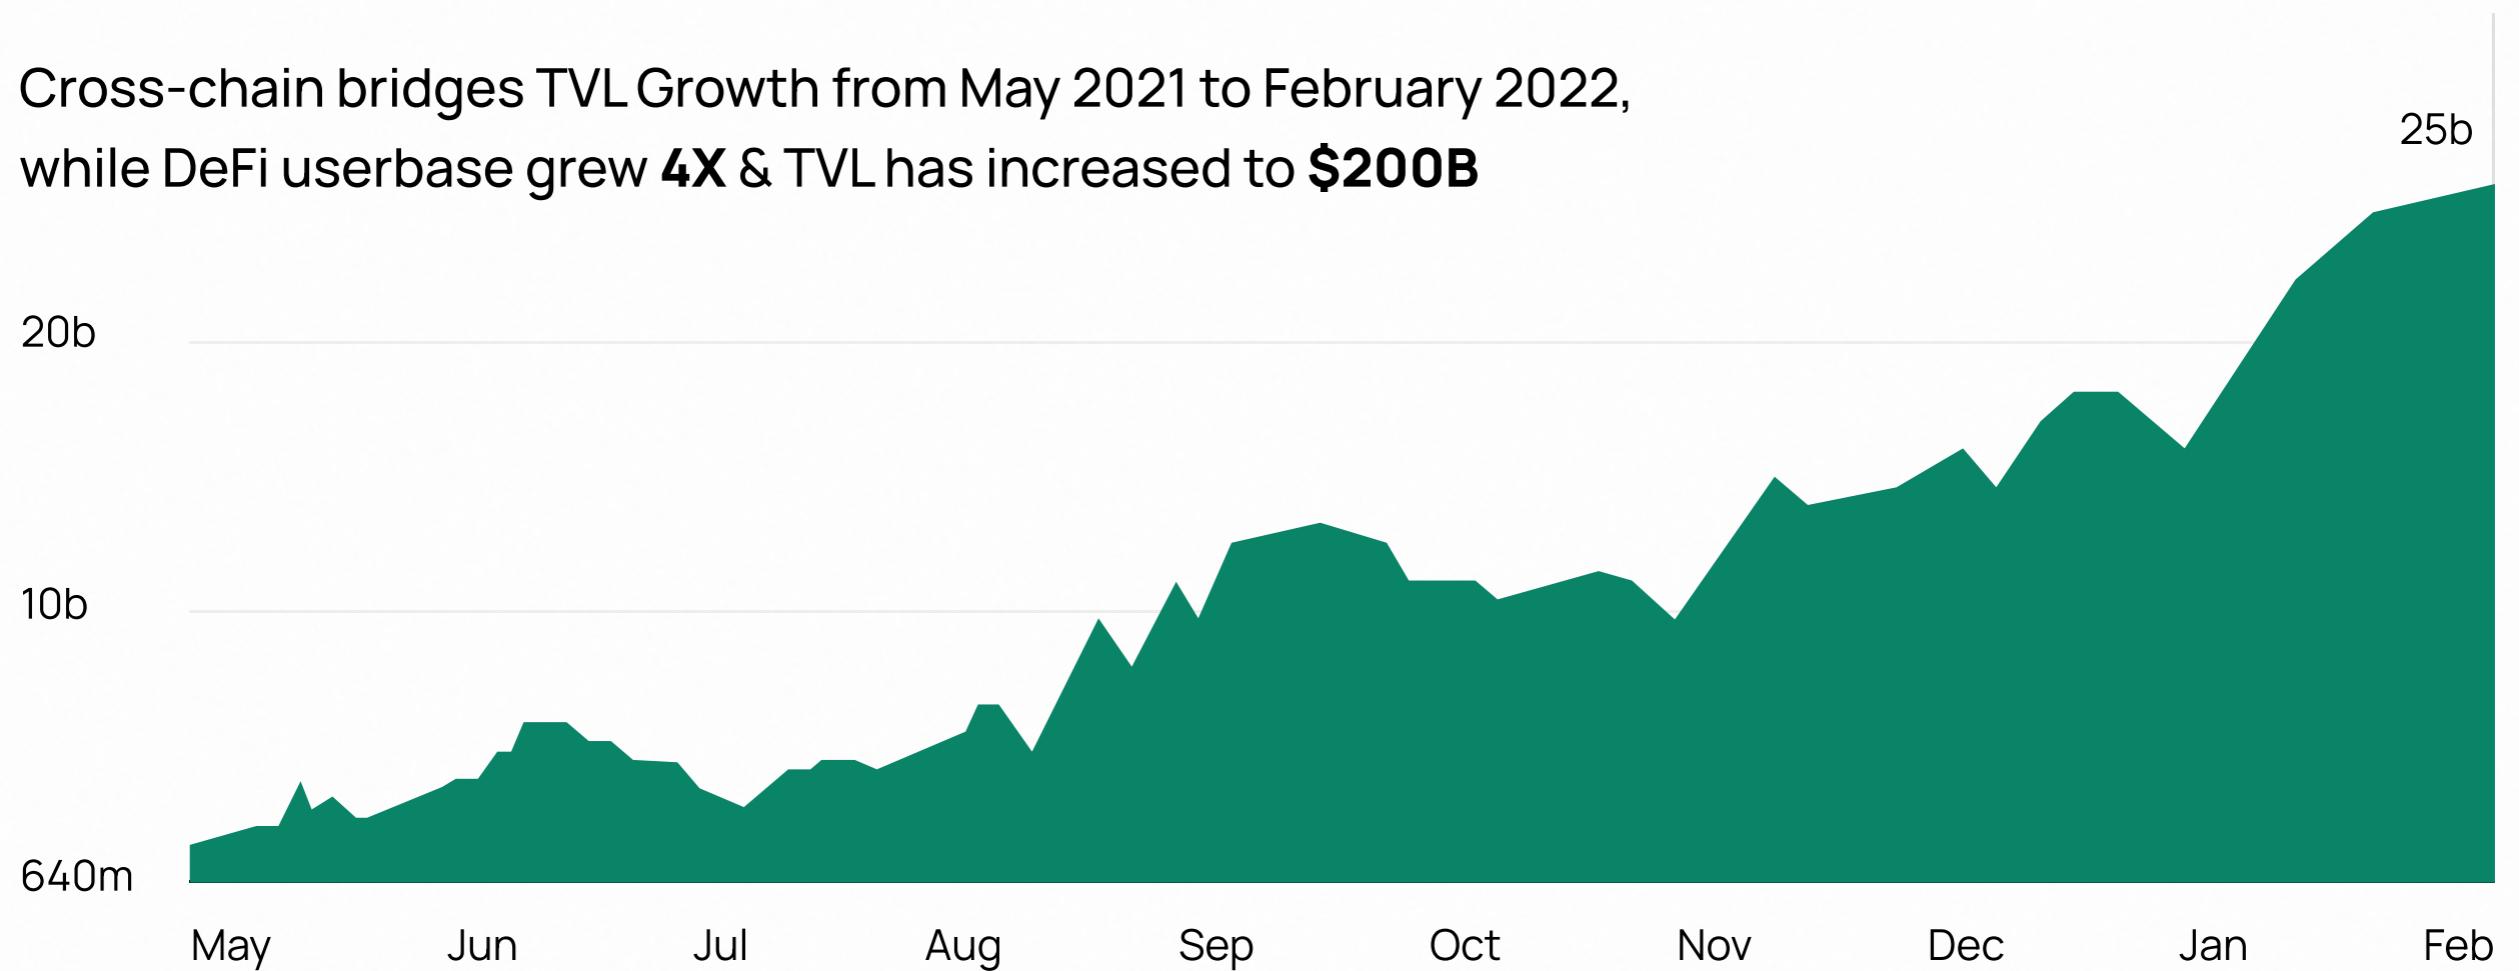

MARKET SHIFT

DeFi grows rapidly and goes multi-chain

+3800%

Cross-chain bridges TVL Growth from May 2021 to February 2022, while DeFi userbase grew **4X** & TVL has increased to **\$200B**

Problem

End user

- Cross-chain interaction is difficult
- DeFi Automation is still limited
- Portfolio building is complicated

DeFi projects

- No smart-contract self-triggering
- Liquidity fragmentation across chains
- Time-to-market with strategies is long

The next **\$10B* opportunity** is in changing the way Cross-chain DeFi automation works to enable new strategies and structured products.

DeCommas

re**D**e**F**ining Automation starts
here

DeFi Automation opens new opportunities

Automated strategies

- ±\$150b of yearly volume of 3Commas in 2021
- Automated strategies in DeFi are limited due to the nature of smart-contracts

Structured products

- \$7 trillion market in traditional finance
- Structured Products in DeFi have not yet exceeded \$1b

ETFs and Index Funds

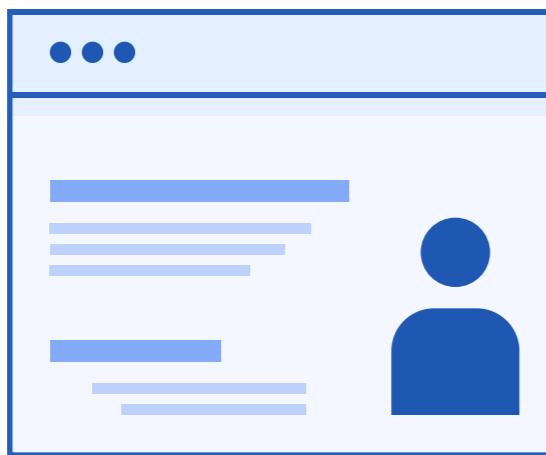

- \$15 trillion market in traditional finance
- ±\$250 mil in DeFi indexes. No cross-chain indexes yet

DeCommas is here to ensure that seizing these **opportunities** is possible.

DeCommas App

dApp for seamless cross-chain interaction and portfolio construction

The screenshot shows the DeCommas dApp interface. At the top, there are dropdown menus for "Cross-chain" and "0x68k...8gF4". Below that is a "Back" button, a "Github" link, and a "Contract" link. The main title is "LONG TERM MEDIUM-RISK PORTFOLIO". A sub-header states: "Your personal index that consists of Digital Assets, Automated strategies & Structured Products across different chains. Deposit from any chain." Below this, there are three tabs: "Deposit/Withdraw" (selected), "Strategy activity", and "Strategy overview".

The "Portfolio performance" section features a line chart showing cumulative P&L of +240.60% over time, with a "USD" label. To the right is a deposit/withdrawal form:

Deposit	Withdraw
Amount (USDC)	
500	Max
Wallet balance available	1000.76611
<button>Deposit</button>	

The "Strategies" section lists four items with their respective chain icons:

- ETH (Chain 6) - AUTOMATED DELTA-NEUTRAL BASIS STRATEGY (USDC) - Chain 6
- AIA AUTO-REBALANCING LENDING (Chain 80)
- PUT-SELLING STRATEGY (USDC) (Chain 133)

At the bottom, there is a "Suggest feature" link.

3Commas Wallet

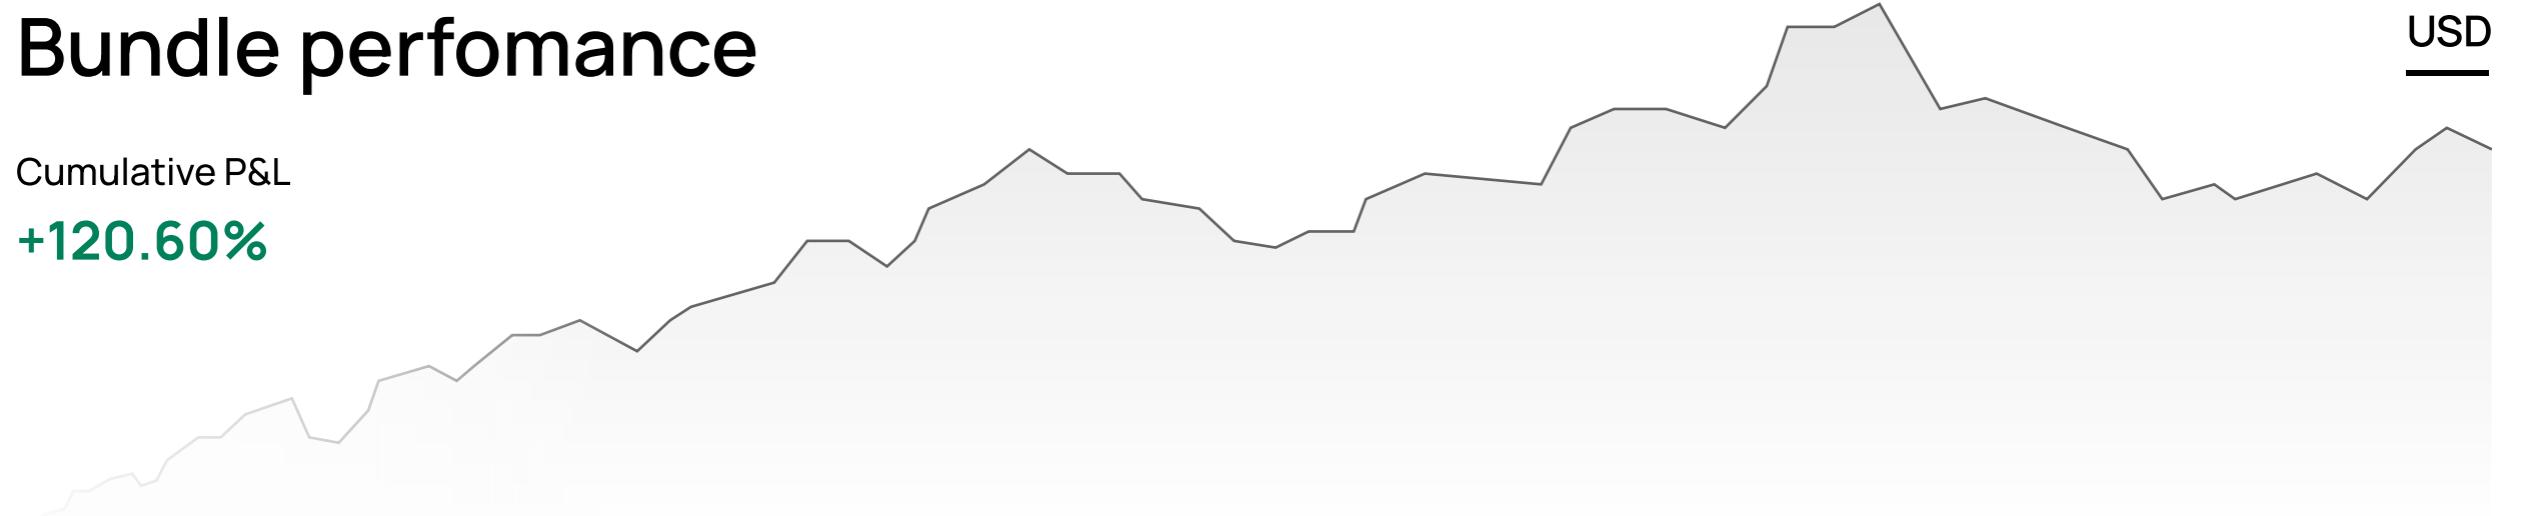

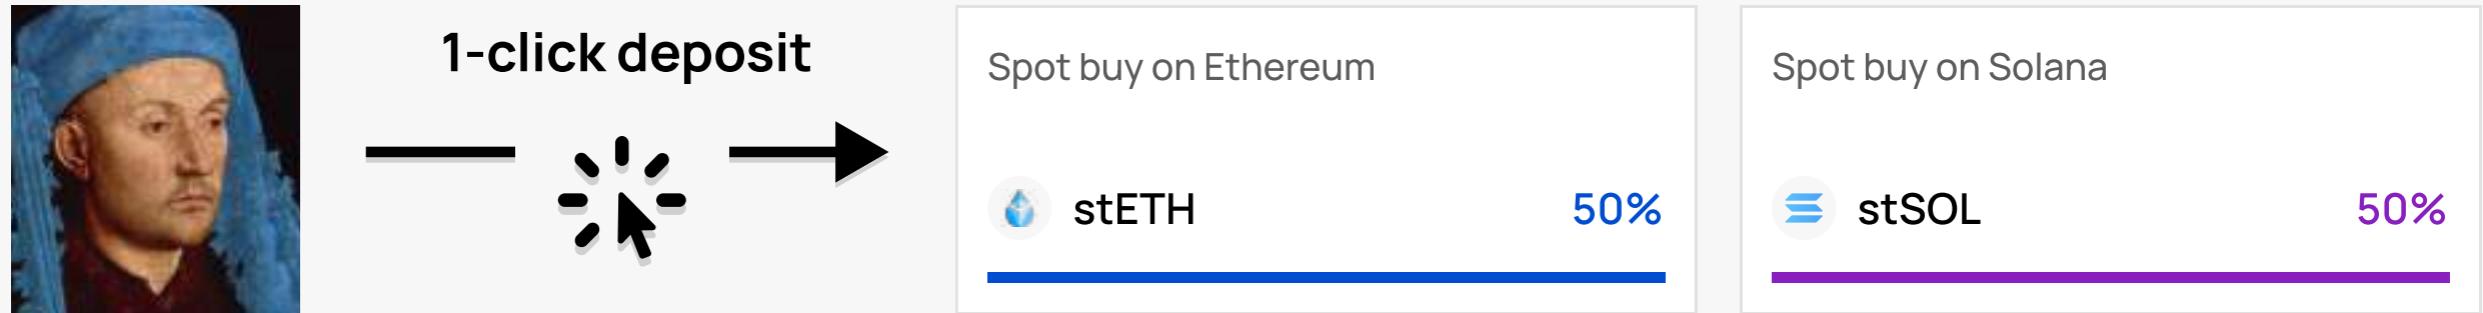

Cross-chain Automation power
in your pocket

The screenshot shows the 3Commas Wallet mobile application. The top status bar shows the time as 12:30. The main header is "Home". A modal window titled "Invest in APY ±15%" is open, showing "DeCommas Strategies" with a "Invest" button. Below the modal, the "Balance" is displayed as \$18,123.44, with a change of +\$435.54 and a green percentage. A "Top Gainers & Losers" section shows Bitcoin (BTC) and Ethereum (ETH) with their respective price changes and logos. At the bottom, there is a navigation bar with icons for Home, Wallet, Tools, Market, and Settings.
